Most Android smartphones nowadays come with a camera with a resolution of 5 to 12 megapixels, bundled in one neat package with advanced camera features. Compared to Apple's iPhone, Android is opensource and allows users to customize basic camera settings to please any user. See also: The best camera apps for AndroidWhen it comes to HDR photos, the secret lies in the software itself, as it is responsible for keeping your photos crystal clear with HD characteristics. While visiting the Google Play Store, we came across a lot of apps that cater primarily to image enhancement. Here are some of the best apps that will turn your photos into HDR photos. Almalence's HDRHDR camera is one of the best HDR cameras on the Google Play Store. Hdr camera offers a wide range of options that allow users to capture dynamic images between the brightest and darkest areas of the image. Daylight photos will have deep dark shadows and clear details in more illuminated areas. An HDR camera can look cartoony if you're not familiar with tweaking app settings. Fortunately for us, the application uses fusion algorithms that automatically adapt to shaky and shaky hands. The software can also detect moving objects on stage, so if you tend to photograph fast moving cars or people doing outdoor activities, then this is the app for you. Not only that, it can also minimize the dilute or ghosting effects. The HDR camera is custom made to turn any Android phone into the ultimate camera. HDR camera for Android on AppBrainCamera360Member a photograph of a work of art with Camera360 for Android. Camera360 has won worldwide recognition for being a popular camera app for every mobile phone. It's even listed as one of the world's top 100 pc technology products. Camera360 is a rugged camera app that requires a little learning before you can take epic photos. When you get to hang camera360, everything will be a walk in the park. Users can add frames and additional decorations to photos, as well as apply filters from Lomo, Retro, or HDR. You can also find several neat features, such as tapping to focus on the subject, as well as setting the color to allow you to adjust the depth and color field of the image. The only drawback of the app is that it quickly eats up your phone's battery. Make sure you're fully charged when you're planning a shooting fest. Camera360 Ultimate for Android on AppBrainRetro CameraRo hailed as one of the kings of photo apps in the Google Play Store is the Retro Camera app from developer Urbian. Turn your Android phone into one vintage high-resolution, which will take you back to the 70s. Make delicious retro camera shutters with retro camera's advance camera techniques. Choose from 5 cameras with 5 sets of vintage effects from movie scratch, black and white, and cross processing just to name a few. The app has been inspired by polaroid, Diana and handheld cameras in the past and has adapted to any Android phone. Post all your best photos on favorite social networking sites like Facebook for friends to see. Instant nostalgia is now free and you'll never have to find another app again. Retro Camera for Android on AppBrainPhotoPanorama ProIf you like to create panoramic photos and then PhotoPanorama Pro is definitely the app suitable for you. Create amazing HD panoramas with your phone's camera. PhotoPanorama Pro will greatly help users create seamless 360 degree panoramic photos with incredible clarity. The secret to the success of the application lies in the orientation sensor, which manages to know the exact angle of each photo, making your photos look professional with incredible quality and detail. Shoot panoramas like a pro and add special effects to every photo you take. The easy-to-use application interface will be very attractive to users because navigation is very simple. All you have to do is point to the object you want to make a panorama and let the app guide you with all the details. Other features include HD mode, setting photos as live wallpaper, and using the camera in portrait mode. PhotoPanorama Pro for Android on AppBrainPro HDR CameraHere's another HDR camera that will turn your Android phone into a real DSLR camera. Introducing the Pro HDR camera, one of the world's first true HDR camera apps for Android users. Create stunning full-resolution HDR images with a quick tap on your Android phone. Say goodbye to traditional bulky digital SLR cameras as Pro HDR Camera automatically create HD photos for you. Pro HDR Camera has image quality software that will bring high dynamic photography coverage. Pro HDR works by capturing exposed images for lights and another set for exposed shadows. To get this HDR look, the app will automatically merge the images, giving the impression of a real HDR image. The app supports up to 8 megapixels of real brightness shots that you've never seen before. Pro HDR Camera for Android on AppBrainAfterFocus AfterFocus combines the best of having a point-and-shoot camera and DSLR cameras in one fantastic app. Bring a DSLR wherever you are, because AfterFocus will use everything in your arsenal to turn your Android smartphone into a DSLR. With AfterFocus, users can create dslr-style high-resolution backgrounds simply by selecting the area they want to edit. You can also apply different filtering effects to create a more natural, realistic-looking photo. AfterFocus is largely based on the user's choice, in which the application automatically recognizes the shaded part and applies the corresponding effect with the appropriate complex shades and colors. The application also allows you to double photo function, takes a picture of one object and slightly takes another shot of the same photo, after which it analyzes the images and recognizes the nearest object. You can also easily share your photos via email or social networking sites, right from the app itself. AfterFocus for on AppBrainCymera from SK Communications is a great way to take portraits or photos of yourself, because the app is dedicated exclusively to this purpose. Cymera is one of the best camera apps that takes portraits, especially hd quality photos.
